## Chemotherapy Nurse - Cancer & Haematology

### Band 6

Do you want to be part of our future?

At Buckinghamshire Healthcare NHS Trust we have a simple vision – safe and compassionate care, every time. We are focussed on a programme of continuous quality improvement, listening to our patients and investing in our workforce to deliver an excellent patient experience.

Buckinghamshire Healthcare NHS Trust was one of the first integrated Trusts in the country, providing acute, community and palliative care in people's homes or from one of our five community hospitals, or two acute hospitals at Stoke Mandeville and Wycombe.

The Trust is committed to providing staff with learning and development opportunities to support their career progression. We offer on-site subsidised childcare, childcare vouchers, flexible working and a generous pension.

If you want to help us provide the best care in a compassionate and professional manner, then we want to hear from you.

This post provides an exciting opportunity for an enthusiastic person to join the chemotherapy and haematology team, working together with the multi-disciplinary team to provide treatment for patients with a cancer or haematology diagnosis.

We are seeking an experienced nurse with good leadership and managerial skills with a passion for cancer and haematology nursing.

---

The aim of the Trust is to provide a high quality standard of healthcare to the population we serve. We do not offer London Weighting but we value our staff and can offer excellent opportunities for further training and development, flexible working, a final salary pension scheme and childcare facilities. We are an equal opportunities employer and are constantly striving to improve the working lives of our staff through consultation and awareness sessions.
